Presentation

Terroir

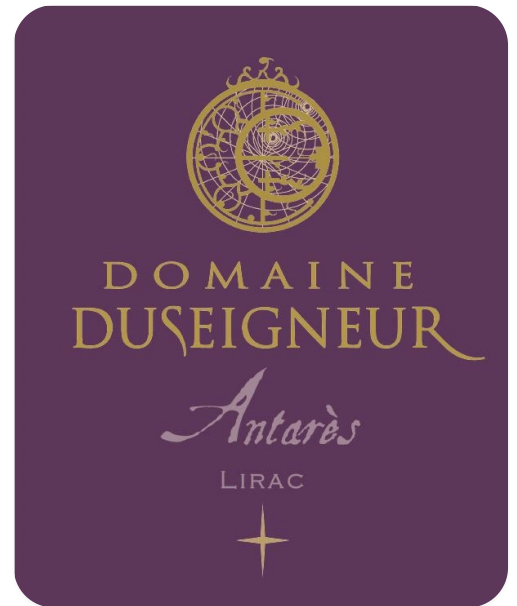

Antarès is a selection of vines located on hillsides facing North, at the Western end of the Lirac appellation, at an altitude of 160m. The soils are deep sands and sandstones.

Varietals

Grenache 60% and Mourvèdre 40%. The vines are 50 years old.

Winemaking and Ageing

The harvest is fully destemmed. Each variety is vinified separately using natural yeasts. The Grenache is aged in cement vats, the Mourvèdre in old French oak demi-muids for 12 months.
